EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The examiner's amendment below was done to correct an obvious misspelling.

The application has been amended as follows:

Claim 12, line 7; replace "single hear cycle" with --single heart cycle--.

REASONS FOR ALLOWANCE

2. Claims 1 and 3-20 are allowed.
3. The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the prior art fails to teach or reasonable suggest a method including:

acquiring an electrocardiogram (ECG) signal, which includes a plurality of heart cycles, for a subject;

determining motion fields indicative of differences between reconstructed volumetric images reconstructed with volumetric CT data from a same heart cycle of the plurality of heart cycles;

determining where motion is minimal based on the motion fields; and

selecting a portion of the volumetric CT data that corresponds to where the motion is determined to be minimal, when taken in combination with all of the other limitations of the claim. Claims 3-8 are allowed by virtue of their dependency.

With respect to claim 9, the prior art fails to teach or reasonable suggest a device including:

- an image processor adapted to perform the following operations:

 - estimating a signal indicative of the single heart cycle;

 - determining a plurality of motion fields from volumetric images generated from the volumetric CT data and estimated signal, wherein the motion fields are based on differences between the volumetric images;

 - determining first time points of the plurality of time points, based on the plurality of motion fields, where motion of the heart in the heart cycle is minimal; and

 - selecting projections from the plurality of projections on the basis of the first time points, when taken in combination with all of the other limitations of the claim. Claims 10-11 and 19-20 are allowed by virtue of their dependency.

With respect to claim 12, the prior art fails to teach or reasonable suggest a computer readable medium encoded with computer executable instructions, which, when executed by a computer, cause the computer to perform the operations of

determining a plurality of motion fields corresponding to a scanned object, wherein the plurality of motion fields is indicative of differences between volumetric images generated from volumetric CT data corresponding to a single heart cycle;

determining first time points of the single heart cycle where the motion of the object is minimal on the basis of the motion fields; and

selecting projections from the plurality of projections on the basis of the first points, when taken in combination with all of the other limitations of the claim. Claims 13-18 are allowed by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
